PEARY TOOK POSSESSION OF POLE FOR THE UNITED

Show His Country's Claim On All that Region and Adjacent Lands

Navy Department Sends Message Extending Hearty Congratulations to Intrepid Explorer

cook Greeted With Flags and Public Welcome In Christiania As First Discoverer of Earth's Axis

(Special from United Press.) Washington, Sept. 11.-Commander lobert E. Peary formally annexed the North Pole and adjacent territory to the possessions of the United States, when he planted the flag there on Amril 6 1909.

He made this announcement in a dis patch sent to the State Department tofay, dated Battle Harbor, via Cape Ray, as follows:

"Hon. Secretary of State,
"Washington, D. C.
"Respectfully report hoisted Stars
and Stripes on North Pole and
formally took possession that entire region and adjacent, for and
in name of President and United
State America. Record and United
States flag left in (new) possession.

The Navy Department also received message from Peary today announcing that he had hoisted the "navy en-

ng that he had hoisted the "navy enlign" at the Pole.

In response, Acting Secretary of the
Navy Winthrop sent Peary the following:

"Your telegraphic report received. Navy Department extends
hearty congratulations on your
successful attempt to reach the
North Pole

North Pole.
(Signed) "WINTHROP,
"Acting Secretary.
"Message of c

After sending the message of con-gratulation, Mr. Winthrop said:
"The Navy Department is naturally wery much gratified that Civil Engin-ter Peary, an officer of the civil en-gineer corps of the navy, has suc-peeded, after many attempts, in reach-ing the Pole."

Bome of the officials of the Navy Department expressed surprise at

epartment expressed surprise at eary's statement that he had hoisted "the navy ensign" on the North Pole. There is no such thing as a "navy ensign" in the American navy. There is no flag recognized in the service except the Stars and Stripes—the same flag that floats over the White House and every army post and public building in the country. There are, of the country. There are, of distinctive personal flags for are also yacht flags and pennants. The ensign is used in both the Brit-ish and Russian navies, but it has no place in the navy of the "one flag, one country", of the United States. As to Peary's announcement to the State Department that he had taken possession in the name of the President and for the United States of America of the North Pole, and of all adjacent territory, Acting Secretary of State Adee declined to make any official response.

official response.

Unofficially, however, State Department officials have declared that according to all evidence at hand, the North Pole is situated in the high seas and that therefore no country could exercise authority or claim jur-

This view is disputed by Dr. Hannis Taylor and some other experts in international law, who hold that the United States could claim jurisdiction over an ice field as well as over hitherto undiscovered land. ediction over it.

Christiania Greets Cook

Christiania, Norway, Sept. 11.-Scenes almost rivaling those that greeted Dr. Frederick A. Cook on his arrival in Copenhagen a week ago, were presented here to-day when the steamer Melchior, bearing the explorer, steamed into the harbor.

Every craft in the harbor was decked in flags and the town, also, is gay with flags and bunting. The mayor of Christiania headed the welcoming committee and presented an address to the

doctor, expressing the admiration and congratulations of all Norwegians. In reply, Dr. Cook expressed his re-gret that circumstances would cut whort his stay here, as he wishes to pall to-day on the Oscar II, of the Scandinavian-American line, for New

The general opinion here is that Commander Peary, having strength-ened Cook's claims by his own narra-tive, will have a hard time in under-mining Cook's statements.

Peary Renews Charges Against Explorer Cook

(Special from United Press.)

New York, Sept. 11.—Commander

Peary affirms his previous statements
to the United Press that Dr. Frederick Albert Cook has never been near the North Pole and asserts that at the proper time he will bring forward proof to back up his statement that proof to back up his statement that
the Brooklyn physician is an impostor.
Commander Peary is still with the
Roosevelt at Battle Harbor, Labrador,
and from that point the following
tablegrams were received by the
United Press to-day:
Battle Harbor, Labrador, Via
Marconi Wireless to Cape Ray, N.

Navy Department, and Coast Survey, and also my telegrams to

Left Flag and Record to BRIDGEPORTER, FAMILIAR WITH POLAR CONDITIONS, AFTER CLOSE SCRUTINY, BELIEVES COOK'S STORY TO BE TRUE

The following critical discussion of Dr. Cook's claim that he is the first man to reach the North Pole is written for the Farmer by a Bridgeport man who has for years been a student of Polar Research, and who himself, at one time, had engaged to be a member of a famous Polar Expedition, which he did not join because of his subsequent ill health. He finds nothing improbable in Cook's statement, much in Peary's statement that sustains Cook, and he disposes of the objection that Cook's equipment was not sufficient for the purpose:

The discovery of the North Pole which has been for nearly a century the object of many explorers, seems now to be an accomplished fact. Yet right on the heels of the announcement arises some doubts as to its accomplishments by the one who makes the first claim.

While Peary's statement is on the whole generally accepted, Cook, who claims priority, has from the first met with doubtful acceptance in some directions. What has been the cause of this remarkable fact? Is the character of Peary more reliable? Are his achievements more surprising or his natural powers for the achievement of this end more a determining factor than Cook's? None of these points have been urged. Cook impresses all who meet him as a man of singular lucidity of temperament and disposition; so much has this affected those who come in contact with him that under ordinary conditions it would almost alone have been sufficient. But this event is far from the ordinary. Proof of the most convincing kind must be forthcoming. This cannot immediately be furnished and meanwhile it is interesting to discuss briefly what are the main objections against accepting Cook's declaration that he has assuredly reached the pole. already been inadvertently answered by Peary.

Several of the objections to Cook's claim before put forth have It seems impossible that Cook could have accomplished the journey in so short a time. Peary did it in even less time, some thirteen days less. It seems strange, said many, that Cook staid but two days at the

Peary staid but one day.

Again, the fact that the pole is not over land, but over open water, has been corroborated by Peary. This is an important point. If Cook had not been there it would be like the tossing up of a coin: his chance of correctness would be as much against as for him. Peary shows that Cook is in fact correct.

What now remains to establish Cook's claim for the discovery of the pole? First of all and most important his want of preparation; his need of the requisites for Arctic exploration. Here we have a man going out in a friend's yacht accomplishing the most difficult feat ever attempted in Arctic research as it were out of hand and apparently very easily. It has always been supposed that a large ship, furnished with mo-

tive power, and a well organized force of officers and crew, were absolutely necessary. But here is a man without any ship and without a companion of his own kind seizing the prize. Does Arctic records furnish us in any way anything similar?

The fact is that a meager We have two striking examples. equipment has often accomplished wonderful results where an elaborate preparation has signally failed. Considering only Arctic explorations we have the case of Sir John Franklin, who with two ships of the British navy, the Eebus and the Terror and a crew of 129 men sailed in 1845 from England to make the northwest passage. The accomplishment of this had been attempted by various navigators for nearly two centuries. Franklin was sure of this, his equipment was so complete. Nothing was heard from him for ten years and then numerous expeditions were sent out for his rescue, both from England and this country. Although nearly a million of dollars and many lives were lost all were failures. This ended official explorations and for several years no attempts were made, when Captain McClintock, with a summer yacht, furnished only for a few months cruise, actually discovered Franklin records near Beechy Island by which it was known, that Sir John Franklin had ships were lost and a few of the surviving crew were in desperate straits. Not a man was ever rescued.

This trip of McClintock was more like a summer outing than an exploring party. In 1903 Roald Amundsen, a Norwegian, equipped a little boat that for several years had been used to catch herring and started to make the northwest passage. This boat was only 70 feet long and of some 40 tons. He had six companions, all but two being scientific men, for on the trip Amundsen intended to make a long series of investigations upon the earth's magnetism, for the ship would pass near to what is called the Magnetic Pole.

Now what resulted? This little boat, with sails like a sloop and not much bigger than many an oyster boat sailing about our Long Island Sound, made the famous northwest passage. Having left Norway in 1903, it sailed through the ice leads along the shores and islands of North America, passed down Behring Straits and reached San Francisco in 1907. and so accomplished that which excellently equipped expeditions, officered by picked men of the British navy, as well as by well trained navigators of other nations, had failed in.

In the light of these results is it not possible for Dr. Cook, with no better preparations than he had to actually solve the mystery of the North Pole? Peary's experience has a latent moral useful to all of us. One of Napoleon's explanations of his wonderful career was this, "When you go out to take Vienna, take Vienna." Peary spent more than twenty years in general Arctic explorations. When he determined to take the boreal Vienna, which should have been his foremost effort and from which he should never have swerved, he finds himself out-gen-

eraled and the prize forever lost. Unswerving steadfastness of purpose, when once the object is determined, makes all the difference in this world between man and man.

BIG JOB FOR STATES MORGAN'S SON

Believed that He Will Step Into Harriman's

Shoes

ELDER MORGAN IS

Union Pacific is the Key to Great Harriman System

Story that Morgan Secretly Visited Harriman Before His Death?

(Special from United Press.) New York, Sept. 11-J. Pierpont Morgan, Jr., son of the head of the great private banking firm, will, it is elieved by many authorities, be elect ed Monday at the special meeting of the directors of the Union Pacific Railroad, to the board, to fill the vaancy and step into the shoes of Edward H. Harriman.

J. P. Morgan & Company have accumulated sufficient holdings in Union Pacific to warrant Morgan, if he insists upon it, in getting a place on the Union Pacific's board of directors. If Morgan cares to show the full strength of his hand, he can also have son made chairman of the board,

it is declared. It is believed Harriman's will is so drawn that the Harriman estate must keep the bulk of his security holdings for many years and that whenever it is to be sold, it is to go to Morgan, Kuhn, Loeb & Company, and the Rockefeller interests. Harriman's will is not to be read until after the fun-

The entrance of the Morgans into Union Pacific would mean far more than the control of the Union Pacific The Union Pacific is the key to the

other Harriman roads. The Union Pacific owns \$287,150,950 worth of stock, par value, and \$33,823,200 worth of bonds, in other railroads, in that way controlling 28 other corporations, way controlling 28 other corporations, steamship lines, express, water, fruit, and equipment companies, its holdings in these concerns having a par value of \$47,349,250. It also owns nearly every dollar of the capital stock of the Oregon Short Line and the Oregon Railroad & Navigation Company, with a par value of \$66,380,590.

To lend strength to the report that Morgan will take over the control of the Union Pacific and its allied lines there comes a story from Arden that last Thursday a week ago, Morgan secretly visited Harriman, who then realized that death was near, and who sought to have his one-time rival take over the roads, to prevent the grab by the financial interests who tried to be the segregation plan while put through the segregation plan while melon" which would have distributed millions of dollars of the assets of the

BUYING U. P. STOCK Berlin Specialist Contends It Was a Humane Act On His Part

> Confidentially Advised Harriman's New Physician There Was No Hope

1,000 Workmen View Body of Dead Financier Today -Funeral Tomorrow

(By Herbert A. White, Staff Corre spondent of the United Press.) Berlin, Sept. 11 .- Prof. Struempel, the Vienna specialist whom the late Edward H. Harriman consulted, held but he strongest encouragement to the dying man and his family, while at the same time informing Mr. Harriman's New York physicians of the utter hopelessness of his case.

Prof. Struempel today enlarged upon his statement of yesterday, telling of his diagnosis of Mr. Harriman's complaint, and he took occasion to correct statement credited to him yesterday a statement credited to him yesterday that he had told the New York physicians that an operation on Mr. Harriman was not at all hopeless.

"When Mr. Harriman arrived in Vienna," Prof. Struempel said today, "the case was already hopeless. He was beyond all medical or surgical relief. I diagnosed the case as cancer of the stomach. I communicated a false and favorable diagnosis to Mr.

of the stomach. I communicated a false and favorable diagnosis to Mr. Harriman and his family because I did not wish to add to their sorrow. In a confidential communication to Mr. Harriman's New York doctors, however, I told them the whole truth. I told Mr. Harriman that an operation was not necessary. It wasn't, for no operation could have saved him." operation could have saved him."

Prof. Struempel's procedure in telling the doomed man an untruth is fully approved by continental physicians, who deem it savage cruelty to tell a man that he must die, unless there be circumstances that make it advisable to inform him of his true condition.

Physicians here say Prof. Struempel made Mr. Harriman's last days com-paratively happy by creating the be-lief in his mind that his condition was not serious and that his recovery was certain. Had he known the truth was certain. Had he known the truth from the outset, he would have died sooner, and been saddened through-out his closing days, they say. Dispatches from Vienna today say that the Viennese doctors are wrought up over intimations of incompetency made against Dr. Struempel and other doctors who saw Mr. Harriman while in that city. These intimations are made in New York cables.

CARD OF THANKS.

The undersigned desire to express their sincere thanks to neighbors and friends who by their many acts of kindness, and floral offerings showed sympathy for us in our late bereavement in the death of our brother, Joseph Fay. Especially to his fellow employees for floral pieces.

"Employer," Box No. 105, Hartford Times, Hartford, Conn.
